| <p>Each system was reviewed and listed as separate P25 system or combined with other P25 systems using the following criteria:</p> <ul style="list-style-type: none"> <li>Systems counted as a unique system if they used frequencies that were not part of another system within the state, county, city or township. This included federal agencies and military within the state.</li> <li>Public Safety systems that combined to include included fire, law enforcement and public works counted as one system with one dispatch. A number of dipatch centers are now operating Law enforcement Digital and fire dispatch in a mix mode.</li> <li>If a system had a separate dispatch then it was listed separately as a fire dispatch, law enforcement or Public works system.</li> <li>Federal agencies had several systems in some states. These systems were considered separate systems if they used different frequency assignments within the federal frequency bands and had a separate dispatch.</li> <li>There are three USFS forests that are digital. Also The BLM is operating in digital in a number of BLM Districts. US Forest Service and BLM law enforcemt use P25 digital with encryption but this does not constitute a P25 system except where noted.</li> </ul> |             |             |             |                                     |            |
